**FIXER, “cloud. config” Fully Managed Service Provider, Raised 1.2 Billion JPY
Funds In Series A Round From Mirai Creation Fund And Other Investors
~Strengthening Development For Industrial and Social Transformation with
Cloud and AI Technology~**

FIXER Inc. (Head Office: Minato-ku, Tokyo; President and Representative Director: Seiichi Matsuoka, hereinafter “FIXER”) has raised a total of 1.2 billion JPY in Series A round of financing, from Mirai Creation Fund II (two) operated by SPARX Group Co., Ltd (Head Office: Minato-ku, Tokyo; President and Group CEO: Shuhei Abe, hereinafter “SPARX”) as well as other investors. FIXER will use the funds to strengthen its core business “cloud.config”, a fully managed service for public clouds; and to develop innovative products in both Fintech and the public sector to enhance support and contribute to clients’ challenges.

■ Background and Purpose of Financing

Established in 2009, FIXER’s objective is to contribute to society, by supporting its clients, both enterprises and municipalities and its employees to take on their challenges, using Cloud and AI technologies. This objective is fully reflected in the company’s corporate statement “Technology to FIX your challenges”.

FIXER’s flagship solution “cloud. config” is a fully managed service, providing design, implementation, operation, monitoring and maintenance for public clouds, such as Microsoft Azure and AWS. This service relieves customers from all infrastructure and cloud-related troubles and enables them to simply focus on services and application development.

On top of this, FIXER is developing highly versatile applications and services to promote the use of public clouds. In September 2019, FIXER launched “Hokkoku Cloud Banking”, Japan’s first Internet banking system inside Microsoft Azure.

Furthermore, as FIXER believes that fostering human resources is key to accelerate Digital Transformation in the public cloud and AI market in enterprises and municipalities, the company is engaging in the education business by opening a “cloud AI school” in both Tokyo and Mie prefecture’s Yokkaichi.

Since its establishment, FIXER has seen a steady expansion of its business at a growth rate of approximately 50% year-over-year without relying on external investors.

The decision of raising Series A round funds arises from FIXER's commitment to meet expectations from both substantial and new clients by hiring new talents and accelerating growth.

■ About Recruitment

FIXER aims to use the funds raised to accelerate its business expansion and is currently hiring full stack engineers, infrastructure engineers and software engineers who are passionate about developing groundbreaking products and services to tackle unique challenges. Furthermore, FIXER is looking for dynamic back office operators who can support the technical team and maximize its corporate value.

If you believe in the power of technology, wish to contribute in invigorating companies and municipalities, and help solving societal issues, then FIXER is waiting for you. You can check the recruitment information from the link below.

■ Overview of the Fund

• Mirai Creation Fund II (two) Investment Limited Partnership (Mirai Creation Fund)

The Mirai Creation Fund I (one) began its operations in November 2015 with SPARX as an operator, with investment by three companies: SPARX, Toyota Motor Corporation, and Sumitomo Mitsui Banking Corporation. In addition to the three core investment areas of Fund I (one), which are “Intelligent Technology” (e.g. artificial intelligence), “robotics”, and “technologies for a hydrogen-powered society”, the Fund II (two) mandate also targets investment in enterprises and projects that possess innovative technologies in “electrification” and “new materials”.

■ About FIXER

Established in 2009, FIXER's objective is to contribute to society, by supporting its clients, both enterprises and municipalities and its employees to take on their challenges, using Cloud and AI technologies. This objective is fully reflected in the company's corporate statement “Technology to FIX your challenges”.

In 2017, FIXER was awarded Microsoft Country Partner of the Year, an award which honors partners at the country level that have demonstrated business excellence in delivering Microsoft solutions.

FIXER's core business "cloud.config", a fully managed public cloud service, received the Azure Expert Managed Service Provider (MSP) in 2019, the highest Microsoft Azure partner certification.
